

1. Explain the difference between Parametric and Non-parametric test with an example.
2. Mention the different Non-parametric tests.
3. Apply run test on
 A: 8 10 12 13 14 16 18 22
 B: 10 9 14 8 16 12 20
4. Test the distribution of two populations is the same by using Wilcoxon paired tests.

X	14	17	19	21	9	11	16	20	12	16	18	20
Y	10	15	18	18	11	18	14	29	6	21	17	15
